Interim Summary: isolated warehouse type building with heavy black, shiny, & cold equipment. Equipment is unimpaired. It is fragile, has calibrated digital & readout. The equipment is moved / stored in large wooden crates. The most prominent people wear brown uniform type clothing with red & gold markings and are perceived to be in charge - direct movement to transportation conveyances of equipment. Assembly is associated with the building - An push-like separate pieces are moved from various sources, assembled and then moved to deployment site.
